1. Executive Summary

JS Choice Group Pty Ltd (trading as JS Choice – Care and Support) is a registered NDIS provider based in Point Cook, Melbourne. Founded by Jan Fardowski, the organization delivers ethical, culturally responsive, and participant-centred disability support services.

This document serves as a comprehensive User Manual and Final Project Report for the JS Choice Group digital platform. It covers all frontend pages, backend modules, admin panel operations, database architecture, and deployment infrastructure. This guide is intended for administrators, team members, and stakeholders who need to understand, operate, or maintain the platform.

Platform At A Glance

51+ Website Pages | 7 Admin Modules | 38+ API Endpoints | 10 Database Tables
Full CRM System | NDIS Tools Suite | Blog & Gallery | Email Automation

2. Platform Overview

The JS Choice Group platform is a modern, full-stack web application that serves two primary audiences:

Audience	Interface	Purpose
NDIS Participants & Families	Public Website	Learn about services, use NDIS tools, submit referrals, read blog content
JS Choice Team / Admin	Admin Panel (CRM)	Manage leads, referrals, blog posts, gallery, analytics, and communications

Platform Architecture

The platform follows a modern monolithic architecture with clear separation of concerns:

- Frontend: Next.js 16 (React 19) with Server-Side Rendering (SSR) and Static Site Generation (SSG)
- Backend: Next.js API Routes (serverless functions)
- Database: Supabase (PostgreSQL) with Row-Level Security (RLS)
- Storage: Supabase Storage for image uploads
- Authentication: Supabase Auth with session management
- Email: Resend API for transactional emails
- Hosting: Vercel (auto-scaling, edge network)
- Domain: jschoicegroup.com.au

3. Technology Stack

Category	Technology	Version	Purpose
Framework	Next.js	16.1.6	Full-stack React framework with SSR/SSG
UI Library	React	19.2.3	Component-based user interface
Language	TypeScript	5.x	Type-safe JavaScript
Styling	Tailwind CSS	4.x	Utility-first CSS framework
Animations	Framer Motion	12.31.0	Smooth page & element animations
Icons	Lucide React	0.563.0	Modern icon library (500+ icons)
Database	Supabase (PostgreSQL)	2.95.3	Managed database with auth & storage
Email	Resend	6.9.1	Transactional email delivery
Rich Editor	TipTap	3.19.0	WYSIWYG editor for blog posts
Charts	Recharts	3.7.0	Data visualization for analytics
PDF Export	jsPDF	4.1.0	PDF generation for budget calculator
Excel Export	xlsx	0.18.5	Spreadsheet exports
Image Processing	Sharp	0.34.5	Server-side image optimization
UI Components	Radix UI	1.4.3	Accessible component primitives
CSV Parsing	PapaParse	5.5.3	CSV data processing

4. Brand & Color System

The JS Choice Group platform uses a carefully designed color system that conveys trust, compassion, and professionalism. Below is the complete brand palette:

Color Name	Hex Code	Preview	Usage
Primary (Lavender Blue)	#ABB3F1		Buttons, links, primary accents, CTAs
Secondary (Coral Pink)	#F1ABAB		Secondary buttons, highlights, accents
Dark Charcoal	#2D3748		Headings, dark backgrounds, footer
Foreground	#1A202C		Body text, labels
Background	#F7FAFC		Page backgrounds
Accent	#E8EAFB		Light card backgrounds, hover states
Success (Green)	#68D391		Success states, positive indicators
Destructive (Red)	#E53E3E		Error states, delete actions
Muted	#EDF2F7		Muted backgrounds, disabled states

Typography

Element	Font Family	Weight	Usage
Headings (H1–H6)	Dosis	200–800 (Black)	All section headings, titles, labels
Body Text	Poppins	100–900 (Regular)	Paragraphs, descriptions, form text
Code / Mono	Geist Mono	Regular	Technical text, NDIS codes

Design Principles

- Rounded corners throughout (2rem – 2.5rem border radius for cards, full-round for buttons)
- Glass-morphism effects (backdrop-blur, transparency) for modern depth
- Framer Motion animations on scroll (fade-in, slide, scale transitions)
- Consistent spacing system (generous padding: 6–8–10 units, section gaps: 20–32 units)
- Fully responsive design across mobile, tablet, and desktop breakpoints
- Dark mode support available
- Buttons always use dark text (#1A202C) on primary/secondary backgrounds

5. Frontend Pages Directory

The platform consists of 51+ public-facing pages organized into logical categories.

5.1 Public Website Pages

Page	Route	Description
Home	/	Landing page with hero slider, about, services, FAQ, areas served, CTA sections
About Us	/about-us	Company story, founder profile, values, commitment, why choose us
Contact Us	/contact-us	Contact form with fields for name, email, phone, message + map
Referral	/referral	Multi-step referral form (6 sections) for NDIS participants
Blog	/blog	Blog listing with search, categories, featured posts
Blog Post	/blog/[slug]	Individual blog post with rich content, author, tags
Gallery	/gallery	Photo gallery with multi-image cards and categories
Career	/career	Careers/job opportunities page
Resources	/resources	NDIS resources and helpful links
Thank You	/thank-you	Confirmation page after form submission

5.2 NDIS Service Pages (15 Pages)

#	Service Page	Route
1	Assistance with Daily Life	/assistance-with-daily-life
2	Psychosocial Recovery Coach	/psychosocial-recovery-coach
3	Assistance with Nursing Care	/assistance-with-nursing-care
4	Emergency Respite	/emergency-respite
5	Group Centre Activities	/group-centre-activities
6	Transportation Assistance	/transportation-assistance
7	Community Participation	/access-to-community-activities
8	Support Coordination	/support-coordination
9	Client & Family Advocacy	/client-and-family-advocacy
10	NDIS-Only Advocacy	/client-and-family-advocacy-for-ndis-participants-only
11	NDIS Access Requests	/ndis-access-requests
12	Innovative Community	/innovative-community-participation-...
13	Employment & Education	/employment-education
14	NDIS Accommodation	/ndis-accommodation
15	NDIS Accommodation Geelong	/ndis-accommodation-geelong

5.3 Location-Based SEO Pages (16 Pages)

Each location page is optimized for local SEO, targeting NDIS participants in specific Melbourne suburbs.

#	Suburb	Route
1	Point Cook	/ndis-providers-point-cook
2	Tarneit	/ndis-providers-tarneit
3	Shepparton	/ndis-providers-shepparton
4	Werribee	/ndis-providers-werribee
5	Hoppers Crossing	/ndis-providers-hoppers-crossing
6	Truganina	/ndis-providers-truganina

7	Craigieburn	/ndis-providers-craigieburn
8	Williams Landing	/ndis-providers-williams-landing
9	Laverton	/ndis-providers-laverton
10	Altona	/ndis-providers-altona
11	Altona North	/ndis-providers-altona-north
12	Altona Meadows	/ndis-providers-altona-meadows
13	South Morang	/ndis-providers-south-morang
14	Footscray	/ndis-providers-footscray
15	Lara	/ndis-providers-lara
16	Epping	/ndis-providers-epping

5.4 NDIS Tools Suite (4 Pages)

Tool	Route	Description
Tools Landing	/tools	Overview of all available NDIS tools
NDIS Price Guide	/tools/ndis-price-guide	Search 5,000+ NDIS support items with region-specific pricing
Price Item Detail	/tools/ndis-price-guide/[code]	Detailed view of individual NDIS support item
Budget Calculator	/tools/ndis-budget-calculator	Plan NDIS budget with add-to-cart, frequency, PDF export
Service Matcher	/tools/service-matcher	Interactive quiz to match participants with recommended services

6. Admin Panel (CRM) – User Manual

The Admin Panel is a comprehensive CRM (Customer Relationship Management) system accessible at /admin. It provides tools for managing leads, referrals, blog content, gallery media, analytics, and user settings.

How to Access the Admin Panel

1. Navigate to: jschoicgroup.com.au/admin/login
2. Enter your email and password
3. You will be redirected to the Dashboard
4. Use the sidebar menu to navigate between modules

Admin Portal Login Steps

1. Open the **Admin Portal** login page.
2. Enter your **Email Address** in the email field.
3. Enter your **Password** in the password field.
4. (Optional) Check **“Remember Me”** if you want the system to save your login details.
5. Click the **Login** button to access the dashboard.

6.1 Dashboard Overview

The Dashboard is the first page you see after logging in. It provides a quick snapshot of your platform's activity and key metrics.

Dashboard Components:

- Total Leads – Count of all incoming inquiries from all sources
- Total Referrals – Count of referral-specific submissions
- Blog Posts – Number of published blog articles
- Conversion Rate – Percentage of leads that moved to 'converted' status
- Recent Activity Feed – Live timeline of latest actions (new leads, status changes, emails)
- Engagement Chart – Visual representation of lead activity over time

Dashboard Overview

After logging in, you will see the **Dashboard Overview** page.

1. Summary Cards

At the top, you can view:

- **Total Leads** – Shows the total number of leads.
- **Total Referrals** – Displays referral count.
- **Blog Posts** – Shows total blog posts (published count included).
- **Gallery Items** – Displays total gallery collections.

2. Recent Activities

Shows the latest actions such as **new referrals** and **new leads**.

Displays the name, type, and date of activity.

3. Engagement Overview

Displays traffic and engagement data.

Includes weekly performance graph (Live status if active).

4. Sidebar Menu

From the left menu, you can navigate to:

- Dashboard
- Leads
- Referrals
- Blog Posts
- Gallery
- Analytics
- Settings
- Logouts

6.2 Lead Management

The Lead Management module is the core of your CRM. Every form submission from the website (contact form, service matcher, budget calculator, NDIS tools) automatically creates a lead here.

Lead Pipeline Statuses:

Status	Color	Description
New	Blue	Just received – needs first contact
Contacted	Yellow	Initial outreach has been made
Qualified	Purple	Confirmed as genuine NDIS participant
Converted	Green	Successfully became a client
Lost	Red	Did not proceed or went elsewhere

How to Manage Leads:

- View All Leads: Navigate to 'Leads' in the sidebar. Use search bar to find specific leads.
- Filter Leads: Filter by status (New, Contacted, Qualified, etc.) or priority (Low, Normal, High, Urgent).
- View Lead Detail: Click on any lead to open detailed view with contact info, service interests, and activity log.
- Update Status: In the lead detail view, change the status dropdown to move leads through the pipeline.
- Add Notes: Use the activity section to add internal notes, log calls, or record meeting outcomes.
- Send Email: Click the email icon to compose and send an email directly to the lead from the CRM.
- Create Tasks: Assign follow-up tasks with due dates, priority, and type (call, email, meeting).
- Export Data: Use the 'Export' button to download all leads as CSV or Excel file.
- Delete Lead: Use the delete option (with confirmation) to permanently remove a lead.

Lead Sources (Automatically Tracked):

Source	Origin
--------	--------

contact_form	Main contact page form submission
referral	Referral form submission
service_matcher	Interactive service matching quiz
budget_calculator	NDIS budget calculator
blog	Blog page inquiry
ndis_tools	NDIS price guide / tools usage
phone	Manual entry from phone call
walk_in	Manual entry from walk-in visit

LEAD	CONTACT	SOURCE	STATUS	PRIORITY	DATE	ACTIONS
Dilawar Khan @sadsads	dev.dilawar@cruxlabs.com.au 0340414822	Referral	New	Normal	16 Feb 2026, 05:35	View, Email, Delete
ssada asdasda	dev.dilawar@cruxlabs.com.au 034446666	Referral	New	Normal	16 Feb 2026, 05:26	View, Email, Delete

Js Choice @Islamabad	jschoice.au@gmail.com 03401417862	Contact Form	Contacted	Normal	11 Feb 2026, 04:22	View, Email, Delete

Lead Management

Go to **Leads** from the sidebar to manage all leads.

1. Lead Summary

At the top, you can see:

- **Total Leads**
- **New**
- **Contacted**
- **Qualified**
- **Converted**

These show the current lead status overview.

2. Search & Filter

- Use the **search bar** to find leads by name, email, or phone.
- Use filter buttons (**All, New, Contacted, Qualified**) to sort leads by status.

3. Lead List Details

Each lead displays:

- Name & Location
- Contact Information
- **Source** (e.g., Referral, Ads Landing Page, Contact Form)
- **Status** (New, Contacted, etc.)
- Priority
- Date

4. Actions

Under the **Actions** column, you can:

- 👁 View lead details
- ✉ Send email
- 🗑 Delete lead

Lead Management

Total Leads: **16**

New: **12** | Contacted: **4** | Qualified: **0** | Converted: **0**

Search leads by name, email, phone...

6.3 Referral Management

The Referral module works identically to Lead Management but is filtered to show only referral submissions. Referrals contain additional details such as participant conditions, service hours requested, cultural considerations, guardian info, and NDIS plan type.

Referral Form Fields Captured:

- Referrer type (self or someone else)
- Participant details (name, DOB, gender, address, phone, email, NDIS number)
- Guardian/nominee information
- Cultural background (country of birth, interpreter needs, cultural/religious considerations)
- Aboriginal or Torres Strait Islander identification
- Primary & secondary service requests with weekly hours
- Disability conditions and additional notes
- Consultation type preferences (in-clinic, in-home, telehealth, community)
- Contact person for appointments
- NDIS plan type (NDIA managed, plan managed, self-managed)

REFERRING FOR	CONTACT	TYPE	STATUS	DATE	ACTIONS
Dilawar Khan Myself	dev.dilawar@cruxlabs.com.au 0340414822	Accommodation	New	16 Feb 2026, 05:35	View, Email

Dilawar Khan Myself	dilawarkhandeveloper@gmail.com 03401417862	Allied	New	7 Feb 2026, 12:23	View, Email

Referral Management

Go to **Referrals** from the sidebar to manage incoming referrals.

1. Referral Summary

At the top, you can see:

- **Total Referrals**
- **New**
- **Contacted**
- **Qualified**
- **Converted**

This provides a quick referral status overview.

2. Search & Filter

- Use the **search bar** to find referrals.
- Use filter options (**All, New, Contacted, Qualified**) to sort by status.

3. Referral Details

Each referral includes:

- Referring For (Name)
- Contact Information
- **Type** (e.g., Accommodation, Allied, Daily-Life)
- Status
- Date

4. Actions

Under the **Actions** column, you can:

- 👁 View referral details
- ✉ Send email

Referral Management
Manage and track all incoming referrals.

Total Referrals: 4, New: 4, Contacted: 0, Qualified: 0, Converted: 0

6.4 Blog Management

Create and manage blog content to engage your audience and improve SEO.

How to Create a Blog Post:

- Navigate to Blog in the sidebar and click 'New Post'
- Enter the title – a URL slug will be automatically generated
- Write your content using the rich text editor (supports bold, italic, headings, links, images)
- Upload a featured image using the image upload area
- Add tags (comma-separated) and select a category
- Fill in SEO fields: Meta Title, Meta Description, Canonical URL
- Choose status: Draft (save for later), Published (go live now), or Scheduled (set a future date)
- Click 'Publish' or 'Save Draft'

Blog Post Statuses:

Status	Description
Draft	Saved but not visible to the public
Published	Live and visible on the website
Scheduled	Will auto-publish on the set date and time
Archived	Hidden from public, preserved for reference

Blog Manager

Go to **Blog Posts** from the sidebar to manage blog content.

1. Post Overview

At the top, you can see:

- Total Posts
- Published
- Drafts
- Scheduled

This shows the overall blog status.

2. Add New Post

- Click the **+ New Post** button (top right) to create a new blog post.

3. Search & Filter

- Use the **search bar** to find blog posts.

- Use the **Status filter** to sort posts (All Status, Published, Draft, Scheduled).

4. Blog List Details

Each post displays:

- Title
- Author
- **Status** (Published or Scheduled)
- Category
- Date

5. Actions

Under the **Actions** column, you can:

-  View post
-  Edit post
-  Delete post

Create New Blog Post

To create a new blog post:

1. Open New Post Page

- Go to Blog Posts.

- Click + New Post.

2. Enter Post Details

Fill in the required fields:

- **Title**
- **Slug** (URL-friendly name)
- **Excerpt** (Short description)
- **Content** (Write your blog content using the editor tools – headings, bold, lists, links, images, etc.)

3. Publishing Options

Under the **Publishing** section, choose:

- **Draft** – Save without publishing.
- **Publish Instantly** – Publish immediately.
- **Schedule Post** – Select date and time to publish later.

4. Additional Settings

- **Category** – Select or enter post category.
- **Tags** – Add relevant tags.
- **Featured Image** – Upload or add image URL.
- **Author** – Select post author.

5. Save or Publish

- Click **Save Draft** to save.
- Click **Publish Now** to make it live.

The screenshot shows the 'New Blog Post' form in the JS Choice Admin Panel. The form is divided into several sections:

- Title ***: A text input field with the placeholder 'Enter blog post title...'.
- Slug ***: A text input field with the placeholder 'blog-post-url-slug'.
- Excerpt ***: A text input field with the placeholder 'Brief description...'.
- Content ***: A rich text editor with a toolbar containing icons for undo, redo, bold, italic, underline, strikethrough, link, unlink, list, and code. The placeholder text is 'Start writing...'.
- Publishing**: A section with a 'Post Status' dropdown menu. The dropdown is open, showing options: 'Draft' (selected), 'Draft', 'Publish Instantly', and 'Schedule Post'.
- Details**: A section with the following fields:
 - Category**: A text input field with the placeholder 'e.g. NDIS'.
 - Tags**: A text input field with the placeholder 'NDIS, Care, News'.
 - Featured Image**: A section with an 'Image URL' text input and an 'Upload' button.
 - Author**: A text input field.

Red boxes and arrows highlight the 'New Blog Post' title, the Content field, the Publishing section, and the Details section.

6.5 Gallery Management

Manage photo gallery content that showcases your services and team.

How to Manage Gallery:

- Navigate to Gallery in the sidebar
- Click 'Add New' to create a gallery card
- Upload up to 5 images per gallery card
- Add a title, description, and assign a category
- Set the display order number to control positioning
- Save the gallery item – it will appear on the public gallery page
- Edit or delete existing items using the action buttons

Gallery Manager

Go to **Gallery** from the sidebar to manage gallery cards.

1. Create New Gallery Card

- Click **+ Create New Card** (top right) to add a new gallery card.
- Each card can contain up to **5 images**.

2. Search Gallery

Use the **search bar** to find gallery cards by title or description.

3. Gallery Card Overview

Each card displays:

- Gallery Title
- Preview Image
- **Number of Images** (e.g., +3 Images)
- Short Description

You can click on a gallery card to view or manage its images.

Create Gallery Card

To create a new gallery card:

1. Open Create Gallery Card

Click **+ Create New Card** from the Gallery page.

2. Upload Images

- Click **+ Add Images**.
- You can upload up to **5 images** per card.
- The counter (e.g., Images 0/5) shows how many images are uploaded.

3. Enter Card Details

Fill in the following fields:

- **Title** – Enter gallery title.
- **Category** – Add category (e.g., Community, Events, Team).
- **Description** – Write a short description.
- **Display Order** – Set the order number (lower numbers appear first).

4. Save

After filling all details, save the gallery card.

Create Gallery Card
Add up to 5 images per card

6.6 Analytics & Reports

The Analytics module provides visual insights into your lead pipeline and business performance.

Available Reports:

- Lead Growth Over Time – Area chart showing new leads per day/week/month
- Source Breakdown – Pie chart showing where leads come from (contact form, referral, tools, etc.)
- Status Distribution – Bar chart showing leads by pipeline status
- Conversion Rate – Percentage of leads converted to clients
- Time Range Filters – Filter data by 7 days, 30 days, 90 days, or all time

Analytics & Reports

Go to **Analytics** from the sidebar to view performance insights.

1. Overview Section

At the top, you can see:

- Total Leads & Referrals
- Gallery Items
- Days with Activity

This provides a quick performance summary.

2. Date & Controls

On the top right, you can:

- Select **date range** (e.g., Last 30 Days)
- Click **Refresh** to update data
- Click **Export** to download the report

3. Growth Overview

- Displays a graph showing lead and referral growth over time.

4. Traffic Sources

- Shows a visual chart of where traffic or leads are coming from.

6.7 Settings & Profile

Manage your admin account and preferences.

- Update display name and job title
- Upload/change profile avatar
- Update phone number and email
- Toggle email notification preferences (new lead alerts, daily digests, etc.)

- Change password
- View account role and permissions

Account Settings

Go to **Settings** from the sidebar to manage your account.

1. Profile Section

Under **Profile**, you can:

- View and update your **Display Name**
- Update your **Job Title**
- Edit your Email Address
- Update your **Phone Number**
- Change your Profile Picture

Click **Save Changes** after making updates.

2. Notifications

- Manage notification preferences.

3. Security

- Update security settings (e.g., password).

4. Sign Out

- Click **Sign Out** (top right) to log out of your account.

7. Backend Modules & API

The backend is built using Next.js API routes (serverless functions). Below is a complete inventory of all API modules and their endpoints.

7.1 Authentication Module

Method	Endpoint	Description
POST	/api/auth/logout	End the current admin session
GET	/api/auth/session	Retrieve current authenticated session

7.2 Lead / CRM Module

Method	Endpoint	Description
GET	/api/leads	List all leads (with filters, search, pagination)
POST	/api/leads	Create a new lead from any form
GET	/api/leads/[id]	Get single lead details
PATCH	/api/leads/[id]	Update lead status, priority, notes
DELETE	/api/leads/[id]	Delete a lead permanently
GET	/api/leads/[id]/activities	Get activity log for a lead
POST	/api/leads/[id]/activities	Add note, log call, or status change
GET	/api/leads/[id]/tasks	Get tasks assigned to a lead

POST	/api/leads/[id]/tasks	Create follow-up task for a lead
POST	/api/leads/[id]/email	Send email to a lead
GET	/api/leads/export	Export all leads as CSV/Excel
PATCH	/api/tasks/[taskId]	Update or complete a task
DELETE	/api/tasks/[taskId]	Delete a task

7.3 Blog Module

Method	Endpoint	Description
GET	/api/blog	List blog posts with filtering
POST	/api/blog	Create a new blog post
GET	/api/blog/[slug]	Get single blog post by slug
PATCH	/api/blog/[slug]	Update an existing blog post
DELETE	/api/blog/[slug]	Delete a blog post
POST	/api/blog/upload	Upload blog images to storage
GET	/api/blog/categories	Get all blog categories
POST	/api/blog/scheduler	Auto-publish scheduled posts

7.4 Gallery Module

Method	Endpoint	Description
GET	/api/gallery	List all gallery items
POST	/api/gallery	Create a new gallery card
GET	/api/gallery/[id]	Get a single gallery item
PATCH	/api/gallery/[id]	Update gallery item details
DELETE	/api/gallery/[id]	Delete a gallery item
POST	/api/gallery/upload	Upload gallery images to storage

7.5 NDIS Tools Module

Method	Endpoint	Description
GET	/api/ndis/search	Full-text search across 5,000+ NDIS items
GET	/api/ndis/autocomplete	Real-time autocomplete for search bar
GET	/api/ndis/categories	Get all 15 NDIS support categories
GET	/api/ndis/item/[code]	Get detailed NDIS item with all region prices
GET	/api/ndis/services	Get JS Choice service offerings
POST	/api/ndis/leads	Create lead from NDIS tools interaction

7.6 Email Module (Resend)

The email system uses Resend API to send branded HTML emails for:

- Admin Notifications – Instant alert when a new lead/referral is submitted
- Client Confirmation – Auto-reply to the person who submitted a form
- Direct Email – Send emails to leads directly from the CRM communication panel
- Follow-Up Reminders – Email reminders for overdue tasks

7.7 Analytics Module

Method	Endpoint	Description
GET	/api/analytics/overview	Dashboard stats (totals, rates, recent activity)
GET	/api/analytics/leads	Lead charts data (growth, sources, status)

8. Database Architecture

The platform uses Supabase (PostgreSQL) as its primary database. Below is the complete schema with all 10 tables and their purposes.

Table	Records	Description
ndis_support_items	5,000+	Complete NDIS price list with region-specific pricing for all Australian states
ndis_categories	15	NDIS support categories (Core, Capital, Capacity Building)
jschoice_services	13	JS Choice service offerings mapped to NDIS categories
leads	Dynamic	All leads/contacts from forms, tools, phone, walk-ins with full CRM data
lead_activities	Dynamic	Activity log: status changes, notes, emails, calls, meetings per lead
lead_tasks	Dynamic	Follow-up tasks with due dates, priority, type, completion status
blog_posts	Dynamic	Blog articles with rich content, SEO fields, scheduling, categories
blog_categories	Dynamic	Blog category taxonomy with parent support
gallery_items	Dynamic	Gallery cards with up to 5 images, categories, display order
profiles	Dynamic	Admin user profiles with roles, avatar, notification preferences

Row Level Security (RLS)

All tables have Row Level Security enabled for data protection:

- Public users can READ: NDIS items, categories, services, published blog posts, gallery items
- Public users can INSERT: leads (form submissions) – but cannot read other leads
- Authenticated admins can CRUD: All tables through the admin panel
- Service role (API): Full access for server-side operations

9. Features Summary

Feature	Description
CRM & Lead Management	Full pipeline tracking, activity logging, task management, email communication, export
Multi-Step Referral Form	6-section referral with participant details, cultural info, service requests, NDIS plan details
NDIS Price Guide	Search 5,000+ support items, filter by category, view region-specific pricing
NDIS Budget Calculator	Add items to budget, set frequency, calculate annual costs, PDF export
Service Matcher Quiz	Interactive questionnaire that recommends services based on participant needs
Blog System	Rich text editor, image uploads, scheduling, SEO fields, categories, tags
Photo Gallery	Multi-image cards, categories, display ordering, Supabase storage
Contact Forms	Contact page form, referral form – all auto-create CRM leads
Email Automation	Admin alerts, client confirmations, direct emails from CRM, HTML templates
Analytics Dashboard	Lead growth charts, source breakdown, status distribution, conversion rates
User Management	Admin profiles, avatars, roles (admin/manager/staff), notification preferences
SEO Optimization	Dynamic meta tags, canonical URLs, 16 location pages, blog categories
Responsive Design	Fully responsive across mobile, tablet, and desktop
Animations & UX	Framer Motion animations, glass-morphism, parallax effects, smooth transitions
PDF Generation	Budget calculator exports to professional PDF with branding
Data Export	Lead export to CSV/Excel for external analysis

10. Security & Compliance

- Authentication: Supabase Auth with secure session management and cookie-based tokens
- Row Level Security (RLS): Database-level access control on all tables
- Role-Based Access: Admin, Manager, Staff roles with appropriate permissions
- HTTPS: All traffic encrypted with TLS/SSL via Vercel edge network
- Input Validation: Server-side validation on all API endpoints
- CSRF Protection: Next.js built-in CSRF protections
- Environment Variables: Sensitive keys stored securely, never exposed to client
- Image Upload Security: File type and size validation on all uploads
- Rate Limiting: API protection against abuse (via Vercel)
- NDIS Compliance: Platform designed to support NDIS Quality & Safeguards requirements
- Privacy: Participant data handling aligned with Australian Privacy Principles

11. Deployment & Infrastructure

Component	Service	Details
Hosting	Vercel	Auto-scaling serverless platform with global CDN edge network
Database	Supabase	Managed PostgreSQL with real-time, auth, and storage
Image Storage	Supabase Storage	S3-compatible object storage for uploads
Email Delivery	Resend	Transactional email API with high deliverability
Domain	jschoicelgroup.com.au	Custom domain with SSL certificate
CI/CD	Vercel Git Integration	Auto-deploy on push to main branch
Monitoring	Vercel Analytics	Performance monitoring and error tracking

Environment Variables

Variable	Purpose
NEXT_PUBLIC_SUPABASE_URL	Supabase project URL (public)
NEXT_PUBLIC_SUPABASE_ANON_KEY	Supabase anonymous key (public)
SUPABASE_SERVICE_ROLE_KEY	Supabase service role key (server-only, secret)
RESEND_API_KEY	Resend email service API key (server-only, secret)
NEXT_PUBLIC_APP_URL	Application base URL

12. Support & Contact
